

Knowledge Assist pilot - policy overview

This policy applies to the Knowledge Assist pilot launching with the customer support and finance operations teams. It describes which document sources are approved, how reviewers should evaluate answers, and how to escalate when an answer cannot be trusted.

1. Approved document sources

Only documents uploaded in the customer portal are approved.

2. Reviewer responsibilities

Every answer must be reviewed to confirm that it is accurate. Reviewers must take this seriously, as incorrect answers can harm the customer experience.

3. Escalation procedure

If an answer is incorrect, the reviewer must mark it as such. If the answer is retrieved from a non-approved source, the reviewer must mark it as such. If the answer is retrieved from an approved source but is incorrect, the reviewer must mark it as such. If the answer is retrieved from an approved source and is correct, the reviewer must mark it as such.

4. Known limitations

Scanned PDFs are not converted into a searchable format. This means that the reviewer cannot search for specific words or phrases within the document. This is a known limitation of the current system.

5. Owners

Policy approved by Omar. Processed by Omar.
